

Nathan Santos

FULL STACK DEVELOPER

Sorocaba, Brazil | nathan.rgs@gmail.com | [+55 15 99741-1076](tel:+5515997411076) |

LinkedIn: | <https://www.linkedin.com/in/nathan-rgs/> | Portfolio: | <https://nathan-rgs.vercel.app/>

PROFESSIONAL SUMMARY

Detail-oriented Full Stack Developer with a Computer Engineering background and international software development experience in Germany. Builds scalable web products with TypeScript, Node.js, React, Vue.js, and modern API architectures, with strong attention to interface quality, reliability, and maintainability.

TypeScript

Node.js

React

Vue.js

NestJS

PostgreSQL

CORE STRENGTHS

Product delivery: production-ready front-end and full-stack execution

Architecture: scalable APIs, data modeling, and system integration

Collaboration: code review, design systems, and agile teamwork

PROFESSIONAL EXPERIENCE

Full Stack Developer

OMIE

Aug 2024 - Present
Remote, Brazil

- Developed responsive, maintainable interfaces from product requirements and UI/UX designs into production-ready code.
- Improved CRM scalability and stability to support continuous product evolution.
- Integrated APIs and services with back-end teams to ensure reliable data flow and smooth user experiences.
- Contributed to design system repositories, increasing component reuse and UI consistency.
- Worked with JavaScript, Vue.js, code reviews, and collaborative GitHub workflows in an agile environment.

Full Stack Developer

Epiouision IT

Feb 2024 - Aug 2024
Sorocaba, Brazil

- Led back-end development with Node.js, NestJS, and TypeScript to deliver robust, scalable APIs.
- Built data access layers with TypeORM and Prisma ORM, improving consistency and performance.
- Delivered full-stack features with React and Tailwind across front-end and back-end layers.
- Worked with PostgreSQL, SQL Server, and MongoDB using solid data modeling practices.

Software Developer for Cloud Computing

Fraunhofer Institute for Production Technology

Jan 2023 - Jan 2024
Aachen, Germany

- Developed cloud-based simulation interfaces with React, TypeScript, JavaScript, and MUI.
- Built Python microservices for engineering simulations with parameter validation and CRUD flows.
- Integrated microservices in cloud environments and consolidated outputs into structured HDF formats.
- Processed manufacturing data for aircraft engine component milling using LabVIEW, DIAdem, and GraphQL.

Web Development Intern

Huawei

May 2021 - Dec 2022
Sorocaba, Brazil

- Developed front-end features for websites and internal systems with JavaScript, Vue.js, HTML, and CSS.
- Implemented responsive interfaces focused on usability, performance, and visual consistency.
- Collaborated on database-driven features involving SQL-based data access.

EARLIER EXPERIENCE

Mechatronics Technician
VCP Industrial Automation

Jan 2020 - May 2021
Sorocaba, Brazil

- Provided IT support across software and hardware environments to maintain operational continuity.
- Maintained internal websites and technical documentation.
- Designed mechanical components with CAD tools and supported automation projects in multidisciplinary environments.

EDUCATION

Computer Engineering

Facens - Sorocaba University of Engineering | Jan 2020 - Dec 2025 | Sorocaba, Brazil

Mechatronics Technician

SENAI | Jan 2017 - Dec 2019 | Sorocaba, Brazil

English Studies

Wizard by Pearson | Jan 2011 - Dec 2017 | Sorocaba, Brazil

High School

CE SESI-123 | Jan 2016 - Dec 2019 | Sorocaba, Brazil

TECHNICAL SKILLS

Front-end	React, Vue.js, JavaScript, TypeScript, HTML, CSS, Tailwind, MUI
Back-end	Node.js, NestJS, Express, Prisma ORM, TypeORM, API integration
Data	PostgreSQL, SQL Server, MongoDB, SQL, database modeling
Workflow	Git, GitHub, Postman, Insomnia, clean code, agile collaboration
Other	Python, cloud computing, systems integration, simulation automation

PROFESSIONAL PROFILE

Working style: autonomous, versatile, and self-taught in acquiring new knowledge.

Quality focus: maintainable code, interface consistency, and dependable user-facing behavior.

Strength in teams: cross-functional collaboration, delivery ownership, and clear technical communication.
